

# Brownfields Match

Match the potential brownfield with its picture.

gas station	warehouse	landfill
mill	railyard	dry cleaners

Can you think of any other possible brownfields?

# What is a Brownfield?

A brownfield is a property that has (or maybe we just *think* it has) hazardous or dangerous things on it.

Brownfields aren't always bad, but cleaning them up can restore the environment, protect human health, and make our city look nicer!

You can think of a brownfield as POTENTIAL. Are there any places in Cortez you think we could cleanup and put to better use?

## How can I help?

A brownfield can be many things (vacant lots, former gas stations, abandoned buildings, dry cleaners, warehouses, and old landfills).

If you think you own or may purchase a potential brownfield property, fill out a **SITE NOMINATION FORM**.

You can find more information & forms by coming to City Hall or at the City website: [www.cortezco.gov/863/brownfields](http://www.cortezco.gov/863/brownfields)
